

Using What You've Got to Improve Processes

Operationalizing resources to build sustainable best practices

Patty Austin, RN, CPHQ
Quality Improvement Specialist

Infection Control Performance Improvement

- Increase in focus
 - Focused survey
 - Community awareness
 - Stakeholder awareness
- Project team members
 - Full time infection preventionist
 - Representation from all facility disciplines and community

Infection Control Performance Improvement

- Current state
 - Collecting the data you need: focused survey, ICAR, survey deficiencies, reportable infections
- Future state
 - Where will you focus time and resources
- RCA – PDSA

Maintaining What Works

- Monitor
 - Direct observation
 - Tools
- Adaptability
 - Ever changing needs
- Feedback
 - From your staff to you
 - From your residents to you
 - From your families to you
 - From regulators to you
 - From you to us
