

## Telehealth Tips | rev. 04.06.20

### Expanded Medicare Coverage During the COVID-19 Public Health Emergency

*Regulations will be effective until the COVID-19 Public Health Emergency declared on 1/31/20 by the Secretary of HHS ends*

Under the emergency declaration and waiver, **ALL Medicare beneficiaries** can receive telehealth services from their home.

#### WHO Can Provide Telehealth Services?

Physicians (MD, DO, DDS, DDM, DPM, OD, DC), nurse practitioners, physician assistants and certified nurse midwives can provide telehealth services to both new and established patients. Other professionals (certified registered nurse anesthetist, licensed clinician social worker, clinical psychologist, registered dietician and nutrition professional) can provide telehealth services within their scope of practice, consistent with Medicare benefit rules.

#### WHY Provide Telehealth Services?

The Medicare population is the most vulnerable to coronavirus. Encourage them to stay home to reduce their risk of exposure when their medical needs can be met remotely. **KEEP THEM SAFE!**

#### HOW Do I Provide Telehealth Services?

During this public health emergency, you can use any mobile computing device or technology such as a smart phone, tablet or laptop that has audio and video capabilities for two-way real-time interactive communication. FaceTime and Skype are examples of approved technology. Telehealth technology platforms offered by IT vendors can also be used. Medicare beneficiaries may not have access to a smart phone or computer to obtain a telehealth service. Encourage your elderly patients to ask a family member or friend for assistance. *\*HIPAA violation penalties will be waived when everyday communication technology is used and providers exercise good faith.*

#### WHAT is the Beneficiary's Cost?

Beneficiary out of pocket costs (deductible and coinsurance) apply to telehealth services; however, healthcare providers have the flexibility to reduce or waive those fees.

#### HOW Do I Bill and Get Paid for Telehealth Services?

When billing professional claims for all telehealth services with dates of services on or after March 1, 2020, and for the duration of the Public Health Emergency, bill with:

- Place of Service (POS) equal to what it would have been had the service been furnished in-person
- Modifier 95, indicating that the service rendered was actually performed via telehealth

#### WHAT Services Can Be Provided?

The following list includes services normally furnished in-person that can be provided via telehealth. This includes common office visits, mental health counseling and preventive health screenings.

96152	Intervene hlth/behave indiv	99498	Advncd are plan addl 30 min		

## Virtual Check-In

- **Patient-initiated** communication to a healthcare provider to determine whether an office visit or remote evaluation of a recorded video and/or image is needed
- Communication can be provided via telephone, secure text messaging, e-mail or a patient portal
- The check-in should not be related to a medical visit within the previous 7 days and cannot lead to a medical visit within the next 24 hours or soonest available appointment
- The patient can be new or have an established relationship with the provider and must verbally consent to receive the virtual services
- Medicare coinsurance and deductible apply
- Billing:
  - Use code G2010 for remote evaluation of a recorded video and/or image, including interpretation and follow-up with patient within 24 business hours
  - Use code G2012 for a brief communication technology-based service

## E-Visit

- **Patient-initiated** digital communication, using a patient portal, that can occur over a 7-day period
- The patient must have an established relationship with the provider and verbally consent to receive the virtual services
- Medicare coinsurance and deductible apply
- Codes for practitioners who can independently bill Medicare for E/M visits:
  - 99421: online digital evaluation and management service, for an established patient, for up to 7 days, with a cumulative time during the 7 days of 5-10 minutes
  - 99422: online digital evaluation and management service, for an established patient, for up to 7 days, with a cumulative time during the 7 days of 11-20 minutes
  - 99423: online digital evaluation and management service, for an established patient, for up to 7 days, with a cumulative time during the 7 days  $\geq$  21 minutes
- Codes for clinicians who cannot independently bill Medicare for E/M visits (PT, OT, SLP, clinical psychologists):
  - G2061: Qualified nonphysician healthcare professional online assessment, for an established patient, for up to 7 days, with a cumulative time during the 7 days of 5-10 minutes
  - G2062: Qualified nonphysician healthcare professional online assessment, for an established patient, for up to 7 days, with a cumulative time during the 7 days of 11-20 minutes
  - G2063: Qualified nonphysician healthcare professional online assessment, for an established patient, for up to 7 days, with a cumulative time during the 7 days  $\geq$  21 minutes
