MAKING a DIFFERENCE...

Combating the Opioid Epidemic

Quality Insights is actively addressing the opioid epidemic by recruiting partners and leveraging existing relationships to provide a wide range of opioid-related education, data, networking and assistance for multiple organizations, including:

Centers for Medicare & Medicaid Services (CMS)

We engage patients, provide tools & resources, promote adoption of prescribing guidelines and convene stakeholders to reduce opioid misuse and diversion, including producing individualized data reports for prescribers and conducting an educational campaign along with technical assistance that encourages the adoption of comprehensive pain assessments and evidence-based pain management approaches across West Virginia, Pennsylvania, Delaware, New Jersey and Louisiana.

Pennsylvania Department of Health

We conduct on-site medical education sessions called Evidence-Based Prescribing: Tools You Can Use to Fight the Opioid Epidemic in six CME-eligible learning modules that are available free-of-charge, with no required minimum participation. Any Pennsylvania provider can contact Quality Insights at pdmpeducation@qualityinsights.org to schedule a free learning session to prevent substance misuse.

Delaware Health and Social Services Division of Public Health

We offer providers comprehensive academic detailing, workflow assistance, tools and resources to encourage participation in Delaware's Prescription Monitoring Program (PMP), increase use of prescribing guidelines, pain tools, urine drug screening and non-opioid alternatives and incorporate safe prescribing practices to reduce opioid misuse and improve overall patient healthcare outcomes.

Healthy Connections

We provide in-kind branding and web development services for this Huntington, West Virginia-based coalition serving pregnant women and mothers with substance use disorder, which includes developing and sustaining an intensive outreach campaign designed to share services, reduce stigma, and measure the most effective strategies for reaching individuals in need of services and transforming public attitudes and perceptions related to addiction and substance use disorder.

But this is just a start. We are ready to contribute more of our clinical, analytic and marketing expertise to address this public health crisis. By collaborating, we can and will make a positive difference in the fight to combat the opioid epidemic.
